## EDUCATION

### State University of New York, Brockport, NY — *BS Mathematics*

Graduated: December 2011

### LaunchCode's LC101, Kansas City, MO

SEPT 2017 - MAR 2018

## EXPERIENCE

### Freelance Consulting— *Web Developer, Math and Operations Contractor*

January 2007 - PRESENT

Using HTML, Python, CSS, and Javascript to build and maintain a portfolio of web application projects and client websites. Provide client directed guidance on a variety of topics. Areas of expertise include personalized education planning, small business operations, and applied mathematics.

### Rocky Greco's, Pittsford, NY — *Business Manager*

January 2012 - May 2016

Responsible for overseeing the operations and management at one of the largest independent-operator salons in upstate NY. Completed administrative functions and coordinated sales plans with salon owners and developed customer promotions in order to drive business. Brought salon up to NY Department of State safety standards and put in place a program to maintain standards

### US Army, Germany & Fort, Drum, NY — *Military Intelligence Analyst*

May 2001 - Sep 2005

Created and maintained a database to track potential threat activity on convoy routes that facilitated analysis of threat patterns. Briefed commanders on daily intelligence analysis reports and provided Convoy Commanders with important information to help effectively and safely conduct numerous supply missions, resulting in minimal enemy contact. Maintained up-to-date security standards for personnel and equipment. Supervised the Company Search and Rescue Team, trained as a Combat LifeSaver, and supervised junior enlisted soldiers and helped maintain morale during deployment.

## PROJECTS

### Blogz — *Python*

This web application is a multi-user blog site that has a user sign-up and user authentication. It allows users to add new blog posts to a main page and browse and read previously created posts.

### AJAXson 5 — *Javascript*

This web application displays a random GIF based on the search term for the Jackson 5. It fetches a GIF from Giphy, and then inserts it into the DOM to display on the page.

### Word Up — *Javascript*

This web application is a game that is a cross between Scrabble, Solitaire, and Boggle.
